USEFUL INFORMATION

PALM ACTIVATED LEVER

The **6" PNEUMATIC ORBITAL** is activated by depressing the metal lever to the body of the orbital. **(PICTURE A)** To change the speed of the orbital there is a speed regulator located below the tail end of the machine. Moving the switch will increase or decrease the air-flow and will change the speed of the machine.

PICTURE A

LUBRICATION

Before using the **6" PNEUMATIC ORBITAL** it is recommended to add four to five drops of gear or air tool oil into the air inlet opening. (1-2 drops of oil should be added after every 3-4 hours of use)

BACKING PLATE REMOVAL

To remove the backing plate from the orbital first disconnect air supply to machine. Hold machine upside down in your hand with the backing plate facing up. Insert supplied wrench in between the backing plate and rubber base of orbital. Turn wrench counter-clockwise to remove. Installation is reverse of removal and requires holding the wrench while spinning backing plate clockwise until tight.
